Professional Summary

Frontend Developer with hands-on experience building web applications using React, JavaScript, and modern web technologies. Developed full-stack projects including an e-commerce platform and IoT monitoring dashboard. Proficient in REST API integration, state management, responsive design, cross-browser compatibility, and web accessibility. Familiar with Agile methodology, including sprints and iterative development cycles. Seeking an entry-level Frontend Developer role to contribute to scalable, user-focused applications.

Technical Skills

Languages: JavaScript, Python, SQL, HTML5, CSS3

Frontend: React, React Router, React Query, Context API, Axios, Bootstrap, Vite, Expo, Responsive Design

Backend: Django, Django REST Framework, REST API, API Integration, Supabase

Database: PostgreSQL, SQL Databases

Tools & Platforms: Git, GitHub, Version Control, VS Code, Android Studio, Vercel (CI/CD pipelines), Postman, npm, pip

Other Skills: Linux, Networking Routing, Switching, OS Installation, Troubleshooting

Soft Skills: Problem Solving, Team Collaboration, Communication, Time Management, Adaptability

Professional Experience

CSIR-NEERI App Developer Intern

July 2024 to January 2025

- Developed IoT monitoring dashboard using Android Studio and Django to visualize real-time environmental sensor data
- Built Android mobile application with live camera streaming for remote monitoring functionality
- Integrated RESTful APIs with PostgreSQL database to manage and display sensor data
- Implemented Python scripts for Raspberry Pi sensor integration and data transmission
- Presented project findings at 2 international engineering conferences, earning Best Paper Publication Award

Align Infotech Software Development Intern

January 2024 to February 2024

- Worked on application development debugging and problem solving tasks

Projects

Smart Bin Monitoring & Tracking System [GitHub](#)

- Designed IoT-based smart waste management system using Raspberry Pi and environmental sensors
- Created Android application for real-time data visualization and live video streaming
- Built RESTful API using Django for sensor data transmission and PostgreSQL storage

Tech Stack: Python, Django, PostgreSQL, Android, IoT

E-Commerce Website

- Built full-stack e-commerce application featuring product catalog, shopping cart, and user authentication
- Implemented global state management using Context API and responsive UI design
- Integrated Django and Supabase backend for real-time database operations

Tech Stack: React, Context API, django, Supabase, PostgreSQL, CSS3

Weather Forecast Application

- Developed responsive weather forecasting application using React.js
- Integrated Open-Meteo API for real-time weather data and forecasts
- Implemented dynamic UI updates with React Hooks for state management
- Followed basic web accessibility practices including semantic HTML and accessible form elements

Tech Stack: React, JavaScript, Open-Meteo API, CSS3

Travel Destination Showcase

- Created interactive travel website showcasing destinations and countries
- Implemented React Router for seamless navigation and dynamic routing
- Developed reusable component architecture and integrated Supabase for content management

Tech Stack: React, React Router, Supabase, CSS3

Education

Bachelor of Technology (B.Tech) in Electronics & Communication Engineering

2021–2025

Tulsiramji Gaikwad Patil College of Engineering, Nagpur CGPA: 8.34/10

- Awarded 3rd Merit Degree Medal for academic excellence

Maharashtra State Board 12th

2021

Percentage: 84%

Certifications

- Meta React Specialization Basics and Advance Meta 2025
- CCNA Cisco 2025
- Python for Data Science NPTEL 2024
- C/C++ Programming AICTE 2023

Achievements & Publications

- Best Paper Publication Award at International Engineering Conference for IoT research
- Presented research papers at 2 international conferences on environmental IoT solutions
