## Summary

Frontend developer specializing in React, Next.js, and modern JavaScript, with experience building scalable and high-performance web applications. Developed production-ready platforms including an AI-powered resume analysis system and a full-stack e-commerce application. Strong focus on performance optimization, accessibility, and user experience. Seeking a Frontend Engineer role to build impactful user interfaces.

## Technical Skills

|                   |                                                                                |
|-------------------|--------------------------------------------------------------------------------|
| Languages         | JavaScript, HTML, CSS, Python, SQL                                             |
| Frontend          | React, Vite, Next.js, React Query, Redux, Tailwind CSS, Responsive Design      |
| Backend           | Django REST Framework (REST APIs, Authentication, CRUD), Supabase              |
| Database          | PostgreSQL                                                                     |
| Tools & Platforms | Git, GitHub, VS Code, Android Studio, Postman, npm, pip, Linux, Vercel, Render |
| Practices         | Agile Development, CI/CD (GitHub-based deployments via Vercel/Render)          |

## Professional Experience

CSIR-NEERI — App Developer Intern

July 2024 to January 2025

- Developed a real-time monitoring interface for an IoT-based smart bin system, enabling visualization of live sensor data and video streams
- Implemented Django REST APIs to manage data flow between hardware, backend, and mobile application
- Awarded Best Paper Publication** at an International Engineering Conference; findings presented across 2 international research conferences

Align Infotech — Software Development Intern

January 2024 to February 2024

- Collaborated in a development team to debug and resolve application issues, improving system stability
- Assisted in frontend bug fixes and UI improvements to enhance user experience

## Projects

AI Career Copilot

Live Demo and GitHub

- Built an AI-powered web application that analyzes resumes against job descriptions to identify skill gaps and generate personalized recommendations
- Implemented a hybrid skill extraction system using rule-based matching and LLM APIs for improved accuracy across various inputs
- Developed RESTful APIs using Django REST Framework for PDF processing, skill extraction, and job-resume matching
- Integrated Google OAuth for secure authentication and user session management

Tech Stack: React, Tailwind CSS, Django REST Framework, Groq API, Supabase, Google OAuth, PyPDF2

E-Commerce Website

Live Demo and GitHub

- Built and deployed a full-stack e-commerce platform with authentication, cart, and order management features
- Integrated Django REST API and Supabase for real-time database operations and persistent user sessions
- Deployed on Vercel/Render; configured CORS and resolved routing issues using rewrite rules

Tech Stack: React, Context API, Django, Supabase, PostgreSQL, CSS3, Vercel, Render

Weather Forecast Application

Live Demo and GitHub

- Developed a responsive weather forecasting app using React Hooks and the Open-Meteo API for real-time data and 7-day forecasts
- UI implemented with semantic HTML, ARIA labels, and keyboard-navigable form elements

Tech Stack: React, JavaScript, Open-Meteo API, CSS3

Smart Bin Monitoring & Tracking System

GitHub

- Built a real-time IoT-based smart bin monitoring system using Raspberry Pi sensors and camera
- Developed an Android app to display live sensor data and video stream for remote monitoring
- Implemented Django REST APIs for data handling; presented at 2 international conferences and received **Best Paper Award**

Tech Stack: Python, Django, PostgreSQL, Android, IoT, Raspberry Pi

## Education

Bachelor of Technology (B.Tech) – Electronics & Communication Engineering

Tulsiramji Gaikwad Patil College of Engineering, Nagpur

2021 – 2025

CGPA: 8.34 / 10

Awarded 3rd Merit Degree Medal for academic excellence

Maharashtra State Board – 12th Grade

2021

Percentage: 84%

## Certifications

- Meta React Specialization (Basics & Advanced)Meta, 2025
- CCNACisco, 2025
- Python for Data ScienceNPTEL, 2024
- C/C++ ProgrammingAICTE, 2023

## Achievements & Publications

- Best Paper Publication Award** at International Engineering Conference for IoT-based environmental monitoring research
- Presented research findings at 2 international engineering conferences on smart city and environmental IoT solutions
