Professional Summary

Fresher Frontend Developer with hands-on experience building and deploying full-stack web applications and IoT systems through internships and personal projects. Proficient in React, Django, and REST API integration. Passionate about writing clean, functional code and eager to contribute to a development team.

Technical Skills

Languages	JavaScript (ES6+), Python, SQL
Frontend	React, React Router, React Query, Context API, Redux, Axios, Bootstrap, Vite, Expo, HTML5, CSS3, Responsive Design
Backend	Django, Django REST Framework, Supabase, REST API Integration
Database	PostgreSQL, Supabase (Real-time)
Tools & Platforms	Git, GitHub, VS Code, Android Studio, Postman, npm, pip, Linux, Vercel, Render
Practices	Agile Development, CI/CD (GitHub-based deployments via Vercel/Render)
Soft Skills	Problem Solving, Team Collaboration, Communication, Adaptability, Time Management

Professional Experience

CSIR-NEERI — App Developer Intern

July 2024 to January 2025

- Built a real-time IoT monitoring dashboard using Android Studio and Django, processing and visualizing live environmental sensor data for field researchers
- Developed an Android mobile application featuring live camera streaming, enabling remote site monitoring and eliminating the need for physical inspections
- Designed a RESTful API pipeline connecting Raspberry Pi sensors to a PostgreSQL database, enabling automated, continuous data logging and retrieval
- Wrote Python scripts for Raspberry Pi to handle sensor calibration, data sampling, and reliable transmission to the backend server
- Awarded Best Paper Publication** at an International Engineering Conference; findings presented across 2 international research conferences

Align Infotech — Software Development Intern

January 2024 to February 2024

- Contributed to application development and QA, identifying and fixing bugs to improve software stability in a collaborative team environment

Projects

E-Commerce Website

[Live Demo](#) and [GitHub](#)

- Built a full-stack e-commerce platform with product catalog, shopping cart, order management, and secure user authentication
- Managed application-wide state using Context API, eliminating prop drilling and improving component reusability
- Integrated Django REST API and Supabase for real-time database operations and persistent user sessions
- Deployed frontend on Vercel and backend on Render; configured CORS, ALLOWED_HOSTS, and environment variables for secure cross-origin communication
- Diagnosed and resolved a production client-side routing bug using Vercel rewrite rules, ensuring all routes load correctly on direct URL access

Tech Stack: React, Context API, Django, Supabase, PostgreSQL, CSS3, Vercel, Render

Smart Bin Monitoring & Tracking System

[GitHub](#)

- Designed a complete end-to-end IoT pipeline: Raspberry Pi sensors → Django REST API → PostgreSQL → Android dashboard
- Built Android app with live video streaming for real-time remote monitoring; presented system at 2 international conferences
- Received **Best Paper Award** for the research paper published on this project

Tech Stack: Python, Django, PostgreSQL, Android, IoT, Raspberry Pi

Weather Forecast Application

[Live Demo](#) and [GitHub](#)

- Developed a responsive weather forecasting app using React Hooks and Open-Meteo API for real-time data and 7-day forecasts
- Implemented accessible UI with semantic HTML, ARIA labels, and keyboard-navigable form elements

Tech Stack: React, JavaScript, Open-Meteo API, CSS3

Travel Destination Showcase

- Built an interactive travel website with dynamic routing via React Router, reusable card components, and Supabase for destination content management

Tech Stack: React, React Router, Supabase, CSS3

Education

Bachelor of Technology (B.Tech) – Electronics & Communication Engineering

2021 – 2025

Tulsiramji Gaikwad Patil College of Engineering, Nagpur

CGPA: **8.34 / 10**

Awarded 3rd Merit Degree Medal for academic excellence

Maharashtra State Board – 12th Grade

2021

Percentage: **84%**

Certifications

Meta React Specialization Basics & Advanced	Meta, 2025
CCNA Cisco	CCNA, 2025
Python for Data Science	NPTEL, 2024
C/C++ Programming	AICTE, 2023

Achievements & Publications

- Best Paper Publication Award** at International Engineering Conference for IoT-based environmental monitoring research
- Presented research findings at 2 international engineering conferences on smart city and environmental IoT solutions
